

Broom! Broom!! Technical Notes

This show is very flexible show when it comes to technical requirements; of course we like to perform in fully equipped theatres with sound and lighting technicians but it can also be performed in spaces such as halls or classrooms with basic sound and lighting controlled by us onstage.

Basic requirements:

- Minimum performance space – 4.5m by 6.5m
- Power
- Performance space must be able to be made dark enough for shadow puppetry
- PA, can be supplied by company for unequipped venues

For theatres please consult our lighting plan which comes as a PDF file in this media pack
